Treatment Prices

Our fees are competitively and fairly priced to reflect the expertise and facilities we provide.

Consultation

Dr Anne Farrell **£395**

Dr Sarah Walsh, Dr Marie-Louise Daly, Dr Sophia Paget or Dr Jonathan Batchelor **£375**

During your visit the consultant dermatologist will address in detail your main skin concern (e.g. full skin/mole check, acne, rash, scars, hair loss, treatments to reverse the signs of skin aging and sun damage). If you wish to discuss additional skin problems, there may need to be an additional charge of £100 per problem to cover the additional consultation time and reports to cover each problem adequately and correctly. After each consultation you will receive some initial written information on your skin issue and a few days later a formal written report will follow by encrypted email through your Carebit account (or by post if you specifically request it). If you have any questions following the consultation you are welcome to contact the clinic afterwards or book a further complimentary consultation with one of our nurses to discuss further.

Free/Reduced Cosmetic and Skin Care Consultation

Dr Anne Farrell **£100**

Senior nurse/laser therapist **£0**

If you have seen one of our consultant dermatologists to discuss a medical/skin cancer concern and subsequently wish to book a consultation to discuss our cosmetic/aesthetic treatments to reverse the signs of skin aging or skin care products.

(For Dr Farrell, the booking must be requested within four weeks of booking or attending the medical consultation).

For patients new to the practice wanting a consultation with a senior nurse/laser therapist, there is a booking fee of £25, which is redeemable against skin care products or treatments.

If patients are new to the practice, an initial consultation is usually required. However, for Botox®, Laser Hair Reduction, Tattoo Removal, HydraFacial® or Microdermabrasion, if a patient knows exactly what he/she wants and is attending specifically for one of these treatments, the consultation may not be necessary.

Followup Consultation (Same Condition Within 18 Months) **£265**

With Dr Anne Farrell, Dr Sarah Walsh, Dr Marie-Louise Daly, Dr Sophia Paget or Dr Jonathan Batchelor.

Repeat Prescription (Ordering from Our Pharmacy) **£12.50**

Please allow 48 hours' notice, plus cost of items and postage cost.

Visia Analysis **£25**

Includes discussion of products/treatments plus printed report with recommendations. Fee redeemed against any product purchase.

Cryotherapy (Freezing with Liquid Nitrogen)

Up to 5 lesions	£185
5-20 lesions	£295
More than 20 lesions	£445

Skin Scrapings for Fungus

£115

Skin Swab for Bacterial Infection

from £95

Change of Dressing (e.g. for leg ulcers)

Small (less than 5cm ²)	£35
Moderate (5cm ² - 20cm ²)	£75
Large (e.g. leg ulcers) (more than 20cm ²)	Up to £125

Steroid Injection With or Without 5-Fluorouracil Injection

Small (less than 5cm ²) steroid alone	£185
Large steroid (more than 5cm ²) or added 5-Fluorouracil	£395

Mole Mapping

£395

New patients will need a consultation with a consultant dermatologist (£365) before mole mapping to check there are no dangerous moles that need removal. All patients need a follow-up visit with the original consultant dermatologist after 3 months (£255) and every 6-12 months depending on the type of moles (£255). The follow-up should be booked and paid for when booking the mole mapping.

Patch Testing for Contact Allergies

starting at £575

Includes application of more than 100 pure ingredients which are common causes of contact dermatitis and reading by a consultant dermatologist on day 4-5. Additional patch testing allergy series can be added according to your occupation (e.g. hairdressing, dental), but at an additional charge, which will be quoted.

Blood Tests

According to laboratory

Photodynamic Therapy for Sun Damage, Solar Keratoses, Superficial Basal Cell Carcinoma, Skin Rejuvenation or Acne (Red Light and Indoor Daylight)

One cycle of LED Red light PD	£930
Two cycles of LED Red light PDT if using same tube of Metvix/Ameluz	£1,395
Two cycles of LED Red light PDT if using separate tube of Metvix/Ameluz	£1,795
(Bowens disease, Superficial BCC and some resistant Actinic Keratoses need two cycles)	
Each additional tube of Metvix/Ameluz	£375

Daylight Photodynamic Therapy

One area (i.e. less than 10 cm ²) with one tube of Metvix/Ameluz	£895
Each additional 100 cm ² with Metvix/Ameluz	£375

Warts and Verrucas (Cryotherapy)

Consultation with consultant dermatologist	£365
First session of cryotherapy if done at first consultation	£85

SUBSEQUENT SESSIONS OF CRYOTHERAPY:

Up to 5	£175
5-20	£295
More than 20	£445

Botox for Hyperhidrosis/Excessive Sweating (Both Axillae)

	DERMATOLOGIST	NURSE/ THERAPIST
Standard Dose 100 units	£555	£455
Moderate Dose 200 units	£855	£695

Iontophoresis for Excessive Sweating (Per Session) £45

Milia Removal or Hyfrecation

	DERMATOLOGIST	NURSE/ THERAPIST
First 15 minutes	£295	£155
For each subsequent 15 minutes	£235	£105

Skin Surgery

Our prices are all inclusive (see below) and we endeavour to match any comparable quotation.

Biopsy of Skin Rash for Diagnosis

£695

Skin sample including consultant's fee, surgical equipment, local anaesthetic, use of minor operating room, histology analysis by an expert Consultant Dermatopathologist (with higher specialist qualifications in skin analysis), dressings, removal of sutures, wound review and written report of results.

Some complicated diagnoses may need more than one specimen:

Price per extra specimen (including histology analysis) £325

Immunofluorescence for certain autoimmune skin rashes (on skin or blood) £245

Flattening of Raised Mole/ Shave Excision

£655

Includes consultant's fee, surgical equipment, local anaesthetic, use of minor operating room, histology analysis by an expert Consultant Dermatopathologist (with higher specialist qualifications in skin analysis), dressings, wound review aftercare and written report of results.

Each additional mole (including histology analysis) Up to £395 depending on complexity

Excision of Skin Lesion

The prices below are a guide, and the exact price will depend on the complexity and will be confirmed as part of your treatment plan after the consultation.

Includes surgical equipment, local anaesthetic, use of minor operating room and facilities, histology analysis by a Consultant Dermatopathologist (with higher specialist qualifications in skin analysis), dressings, suture removal, wound review aftercare and report of results.

For our consultant plastic surgeons there may be an additional fee to cover consultation.

Small benign lesion (<5cm) starting from £885

Each additional standard sized skin lesion (price depending on complexity) up to £395

Excision of skin cancer or larger lesion, cyst (>5cm) £995

Each additional skin cancer or larger lesion (price depending on complexity) up to £395

Skin graft or Flap repair from £600

Ear Lobe Repair by Consultant Plastic Surgeon from £850

Scar revision by Consultant Plastic Surgeon (depending on size) from £695

Mohs surgery including consultant dermatologist and pathology support from £3,400

Mohs reconstruction £650

Pulsed Dye/KTP laser to improve quality of subsequent scar within 10 days of suture removal

£45

Removal of Small Skin Tags (less than 2mm diameter) by Snipping with Local Anaesthetic

First one	£465
Up to 5 more	add £185
Up to 10 more	add £245
More than 10	add £435
More than 20	add £765

Price includes analysis of the specimens removed as it is good medical practice to send all specimens removed for analysis. Skin tags can also be treated by cryotherapy or hyfrecation but usually need more than one session. Small skin tags can also be flattened with erbium or CO₂ laser.

Repair of Enlarged Earlobe by Plastic Surgeon

One earlobe	£990
Two earlobes	£1,350

HydraFacial®, Microdermabrasion, LED Lights and Laser Packages for Acne and Skin Rejuvenation

HydraFacial®

A gentle facial which uses a fine water jet to cleanse pores, exfoliate 'dead' skin cells and hydrate the skin using a patented technology to infuse nutrients and antioxidants into the skin followed by red and blue LED light. The treatment will be tailored to your specific skin issue whether it be acne, brightening or anti-aging. It is beneficial for all skin types and in particular is an excellent 'red carpet' facial to give the skin extra hydration and glow before a special event. Unlike many clinics, our price for the face means a 'Platinum with Booster' treatment and automatically includes seven step lymphatic drainage and a customized 'Booster Step'.

HydraFacial® Platinum with Booster for face	£225
HydraFacial® Platinum for face and neck	£285
HydraFacial® Platinum for chest	£225
HydraFacial® Platinum for upper back	£255
HydraFacial® Platinum for face, neck and chest	£395
HydraFacial® Platinum for face, neck, chest and back	£455
Introductory first session of HydraFacial® with Booster for face for acne patients	£195

If you complete a course of six HydraFacials, you get one complimentary Genesis Treatment (this does not apply if you are already doing an acne package).

Microdermabrasion/Crystal Peel

A gentle crystal exfoliation to remove dead skin cells, excess oil, unblock pores and stimulate collagen production. Beneficial for most skin types (we will advise you if your skin type would benefit).

Per treatment	£65
Course of 6 (pre-paid i.e. 6th treatment free)	£325

Pulsed Dye/KTP laser to speed up healing of spots, shrink active spots and reduce scarring – with Nurse/Laser Therapist

To remove redness, shrink inflamed active acne spots, reduce the risk of scarring and reduce long-term acne activity. Red marks from acne may look very slightly swollen for a couple of days and then fade more quickly. This is helpful to add to any acne treatment plan. This is a gentle treatment which does not hurt, is suitable for those with fair skin of all ages and can be repeated every 2-4 weeks.

1-5 Spots	£95
5-30 Spots	£125
Face (more than 30 Spots)	£195
Back	£195

LED Light Treatment for Acne, Rosacea and Skin Rejuvenation

Red and Blue lights have been shown to kill the bacteria which cause acne. Red and Infrared (invisible) light have been shown to reduce inflammation and stimulate collagen production which may help fine lines and skin texture. A gentle relaxing treatment with no healing time and suitable for all skin types including the most sensitive rosacea skin. It is gentle and safe long term. There is no recovery time.

1 session	£65
8 sessions (pre-paid)	£450

LED Red or Infrared Light (After Any Procedure)

£45

Can be added after any procedure to reduce inflammation, speed up healing, stimulate additional collagen production and improve skin texture.

LED Light Package with Microdermabrasion for Acne or Skin Rejuvenation

In the case of acne, red and blue lights are used. In the case of rejuvenation, red and infrared (invisible) lights are used. The treatments are best done as weekly microdermabrasion with either one LED light alternating twice a week for four weeks, or as both LED lights on the same day once a week for four weeks. It combines the benefits of both microdermabrasion and LED lights.

ONE AREA = FACE OR CHEST OR BACK

8 light sessions and 4 microdermabrasions for one area	£850
16 light sessions and 8 microdermabrasions for one area	£1,450
8 light sessions and 4 microdermabrasions for two areas	£1,450
16 light sessions and 8 microdermabrasions for two areas	£1,950
If one chooses to upgrade from a Microdermabrasion session to a Hydrafacial session, the cost of each upgrade session	£125

Pulsed Dye/KTP laser can be added every 2-4 weeks to reduce red marks and reduce the risk of scarring.

AviClear

Nurse/Therapist	£995
------------------------	-------------

The first laser to be developed to specifically reduce excess oil production and permanently reduce oil glands. FDA and CE approved for treatment of mild, moderate and severe acne. Results develop steadily over time, and studies report 92% of patients see at least half of their inflammatory acne resolve at 12 months. Three treatments over three months are recommended.

Fotona Acne Laser Treatment (8th session free)

This uses two gentle settings of long pulse NdYag laser to heat the oil glands and reduce bacterial growth. No discomfort and no recovery time needed. Done repeatedly it can improve acne by shrinking oil glands. At least 6-8 sessions are required to achieve an improvement. Also improves scars and skin texture

For acne repeat once or ideally twice a week for at least 4 weeks.

	DERMATOLOGIST	NURSE/THERAPIST
Face	£295	£165
Back	£295	£195
Chest	£295	£195
Face and Neck	£350	£225
2 Areas (Face, Chest or Back)	£395	£275
3 Areas (Face, Chest and Back)	£450	£345

Microdermabrasion and Fotona laser package (4 Microdermabrasions and 8 Fotona laser sessions over four weeks i.e. once a week). Price for one area:

(cleanses pores, reduces pore size, reduces acne bacteria growth, shrinks overactive oil glands, helps fine lines and improves texture).

Ideally used alongside a red and blue home device	£1,445
Additional second course of 4 Microdermabrasions and 8 Fotona lasers every 2 weeks	£995
If upgraded to a HydraFacial instead of a microdermabrasion, the cost of upgrade per session	£125

Pulsed Dye/KTP laser can be added every 2-4 weeks to reduce red marks and reduce the risk of scarring.

Microdermabrasion, LED light and Fotona laser package (8 LED lights, 4 Microdermabrasions, 8 Fotona laser sessions over four weeks i.e. once a week). Price for one area:

(cleanses pores, reduces pore size, reduces acne bacteria growth, shrinks overactive oil glands, helps fine lines and improves texture).

Usually used alongside a red and blue home device	£1,795
Additional second course	£1,295
If upgraded to a HydraFacial® instead of a microdermabrasion, the cost of upgrade per session	£125

Pulsed Dye/KTP laser can be added every 2-4 weeks to reduce the red marks and reduce the risk of scarring.

Treatment of Redness and Thread Veins (Including Acne Rosacea and Sun Damage)

Laser Genesis with Nurse/Therapist

£235

For six (i.e. £195 each)

£1,175

A very gentle laser treatment using low settings of long pulse NdYag laser to gently reduce redness, reduce active acne spots, stimulate collagen production, reduce melasma pigmentation and reduce pores and scars. No discomfort (it feels like a gentle warmth on the skin) and there is no healing time needed, and patients often report that the skin has a flattering glow afterwards. Can be done all year round on all skin types. Popular as a gentle treatment for acne or before an event to help the skin look fresher. Done repeatedly the skin looks fresher and rejuvenated.

Vascular (Excel V or Pulsed Dye) Laser to Reduce Facial Redness, Rosacea and Facial Thread Veins

	DERMATOLOGIST	NURSE/THERAPIST
Test Dose (up to)	£50	£30
Thread veins on nose	£395	£225
Small area up to (up to 1/4 face) (fourth session half price)	£395	£295
Moderate area up to (up to 1/2 face) (fourth session half price)	£535	£395
Full Face or Chest	£655	£445
Full Face or Chest plus neck	£795	£495
Full Face and Chest	£875	£595
Full Face, Neck and Chest	£995	£695
Angiomas (up to five)	£300	£200
Angiomas (5-20)	£395	£295
Angiomas (more than 20)	£655	£395

Lumecca Intense Pulse Light (Photo Facial) (6th session free)

One of the most effective intense pulse light treatments available. Reduces redness and brown spots and, if done repeatedly, stimulates collagen and reduces fine lines and pores. If done regularly it has been demonstrated to make older skin produce some of the signals and chemicals found in younger skin, resulting in skin which looks younger and fresher as well as having reduced redness and brown marks

	DERMATOLOGIST	NURSE/THERAPIST
Face or Neck	£365	£295
Face and Neck	£420	£395
Chest	£420	£295
Face and Chest	£545	£475
Face, Neck and Chest	£695	£550
Hands	£275	£185
Hands and Arms or ½ Legs	£495	£395

Suggest initial course of 6 and then once or twice a year for maintenance.

Laser Treatment of Thread Veins on Legs

Reduces thread veins, several sessions may be required.

Strongly recommended to wear support stockings afterwards for 1-2 weeks £60 per pair

DERMATOLOGIST

15 minutes **£495**

30 minutes **£695**

Sclerotherapy of Leg Veins by Specialist Sclerotherapy Nurse

30 minute session **£375**

Strongly recommended to wear support stockings afterwards for 2 weeks £60 per pair

A consultation with the sclerotherapy nurse is needed before the first session **£50**

Wrinkle Reducing/Skin Rejuvenation Treatments: Injectables

Botox®: Reduces excessive muscle activity

Prices include a follow-up appointment at 2 weeks, if required, and reflect the fact the treatment is performed by a consultant dermatologist, Dr Farrell, rather than a nurse. Dr Farrell has over 20 years' experience of using Botox® and uses doses of Botox® which aim to maximise duration, but also aiming for a natural rested look. To maintain the benefits, repeat every 3-4 months.

Prices start from:

One area (i.e. average frown lines or forehead or crows feet)	£295
Two areas	£395
Three areas	£495
Neck/Platysmal Bands	£345
Botox® 'Lower Face Lift' using Botox® to relax and lift the lower face	£355
Masseter muscle (for overactive jaw clenching/teeth grinding) or slimming of the jawline	£425
Each additional small area: (such as lower eyelids, extra strong frown lines, 'bunny lines', eyebrow lift, lines around mouth, chin, downturn of mouth)	£95
If one additional small area is done as a standard treatment alone	£265

Fillers: Restores Volume and Re-Contours and improves fine lines

These Fillers are pure hyaluronic acid which is a lubricating sugar naturally found in the body. It also has the advantage of being able to be dissolved. Performed by Dr Farrell who has over 20 years' experience of using fillers.

Prices per 1ml syringe start at:

Belotero Soft or Restylane Fine Lines or RH2 (for fine lines)	£535
Belotero Balance or Restylane	£585
Belotero Volume, Belotero Intense or Voluma (for restoring lost volume, recontouring and providing deep support)	£655
Lip Enhancement	£665

Skin Hydration Boosters

Restylane Vital Light or Belotero Revive (light hydrating dermal injections of hyaluronic acid to hydrate the skin)

PRICE PER SYRINGE	DERMATOLOGIST	NURSE
Face	£565	£465
Chest	£565	£465
Hands	£565	£465

Profhilo (Deep Hydration and Elastin Simulation) for face, hands, neck, chest or arms

A hydrating dermal injection which stimulates elastin development of your own elastin and collagen.

	DERMATOLOGIST	NURSE
For 1 treatment (using 2ml in total)	£495	£425
2 treatments (recommended to have two sessions one month apart)	£895	£750

Radiesse for Hand Revoluminisation

£625

Radiesse is a filler containing calcium hydroxylapatite which stimulates your own collagen production. It is particularly useful for restoring volume of the hands. Performed by Dr Farrell.

Polynucleotides (Ameela or Plinest)

Polynucleotides are small signals which stimulate collagen production and skin elasticity and hydration but are not intended to change volume. They can be used to improve skin quality at any site including under eye puffiness and dark circles. It is usually recommended to do two sessions two weeks apart and then a maintenance treatment every 6-8 months.

	DERMATOLOGIST	NURSE
Tear trough single treatment	£595	£???
Tear trough two treatments	£1,120	£???
Elsewhere on face – single treatment (one syringe 2ml)	£475	£395
Elsewhere on face – two treatments (one syringe each treatment)	£895	£750

Polynucleotides with Hyaluronic Acid (Newest)

Polynucleotides combined with Hyaluronic acid have the skin benefits of polynucleotides (stimulate collagen production, elastin and hydration) and also restore volume. We usually recommend two treatments four weeks apart and then additional treatments as needed.

	DERMATOLOGIST	NURSE
Single treatment (one syringe)	£475	£395
Two treatments (one syringe each time)	£895	£750

Biostimulation - Use of hyper-dilute Radiesse to stimulate one's own natural collagen and elastin production. Can be used on Face, Neck, Chest, Buttocks, Thighs, Knees, Upper Arms.

Radiesse is a filler which has been approved in the UK and USA for several years. When injected it produces immediate filling but also stimulates the body to produce its own natural fresh collagen. The particles of Radiesse are broken down by the body after 18-24 months, but the new fresh collagen can last longer. It has been shown that using a very low 'hyper-dilute' concentration, it can gently and gradually stimulate new collagen and improve skin quality on many sites including face, neck, chest, arms, thighs, above the knees and buttocks. It can also be used to improve the appearance of cellulite.

DR FARRELL

Prices for one syringe (which is required for an area of 10 x 10cm) **£595**

NCTF

A collection of 59 essential nutrients including 12 vitamins, 24 amino acids, 6 minerals, 6 co-enzymes, nucleic acid and antioxidants. These nutrients are used by the skin cells called fibroblasts in the production of collagen and elastin. The results are increased hydration, improvement in radiance, tone, fine lines and elasticity.

	DERMATOLOGIST	NURSE
Single treatment (one syringe)	£370	£285
Full course of three treatments (one syringe each time)	£995	£685

Bespoke Combinations Hyaluronic Acid, Radiesse, Profhilo, Polynucleotides and NCTF can be Used for Optimal Individual Results. (Combinations discussed during consultation and priced for the syringes used).

Ultrasound Guided Dissolving of Fillers

from £675

for complications of treatment done in another clinic

Ultrasound Guided Reversal of Vascular Occlusion

£895

as a complication of treatment done in another clinic

Wrinkle/Skin Rejuvenation Non-Injectable

HydraFacial®

A gentle facial which uses a fine water jet to cleanse pores, exfoliate 'dead' skin cells and hydrate the skin using a patented technology to infuse nutrients and antioxidants into the skin. The treatment will be tailored to your specific skin issue whether it be acne, brightening or anti-aging. It is beneficial for all skin types and in particular is an excellent 'red carpet' facial to give the skin extra hydration, plumpness and glow before a special event. Unlike many clinics, our price for the face means a 'Platinum with Booster' treatment and includes lymphatic drainage and a customised 'Booster Step'.

NURSE/THERAPIST

HydraFacial® Platinum with Booster for face	£225
HydraFacial® Platinum for face and neck	£285
HydraFacial® Platinum for chest	£225
HydraFacial® Platinum for upper back	£255
HydraFacial® Platinum for face, neck and chest	£395
HydraFacial® Platinum for face, neck, chest and back	£455
Introductory first session of HydraFacial® with Booster for face for acne patients	£195

If you complete a course of six HydraFacials®, you get one complimentary Genesis Treatment (this does not apply if you are already doing an acne package).

Micropen/Dermapen (Microneedling) (6th session free)

'Pen' containing tiny microneedles which is gently brushed against the skin to make microscopic holes which heal within a few hours. This feels like vibrations and stimulates collagen production. Done repeatedly it can help fine lines, skin texture and scars. The skin looks pink for 1-2 days afterwards, but make-up can be applied after 24-36 hours. Can be done if there is a tan and for all skin colours. Can also be used to deliver specific treatments to the skin e.g. to help reduce pigment.

DERMATOLOGIST

NURSE/THERAPIST

Full Face	£465	£395
Cheeks only	£355	£295
Upper Lip	£355	£255
Face and Neck	£695	£495

Can be followed by infrared (invisible) LED light for additional collagen stimulation and faster recovery for an additional £45.

DERMATOLOGIST

NURSE/THERAPIST

PRP (Platelet Rich Plasma) (6 th session free)	£485	£395
---	------	------

A method of extracting your own concentrated natural growth factors from your own blood and then applying them into a site that needs treatment following Micro-needling or Ablative laser. Used to enhance collagen production and speed up healing on any body site, particularly the face and scars. It is also used to treat hormone/age hair loss and hair shedding.

Skin Tightening - Sofwave

Sofwave Ultrasound Technology For Skin Tightening

Highly focused ultrasound to tighten the skin. There is no recovery time. The full effect of one treatment is seen at six months. Most patients then decide to repeat it for additional benefits after 6-9 months. For a second session repeated within 10 months a 10% discount can be applied. Price includes complimentary red LED light treatment afterwards.

NURSE/THERAPIST

Face and under chin one session	£1,999
Face and submental (jawline) one session	£2,750
Brow Lift one session	£600
Brow Lift and eyes one session	£995
Neck one session	£2,200
Neck and jawline one session	£2,750
Face and Neck one session	£2,999
Cellulite or body tightening including arms. Each area of 4x4cm	£290

"Super Tightening" Packages (Sofwave plus Fotona)

Sofwave, followed a month later with two sessions of Fotona with T-Runner and Fotona Super Piano for that area, one month apart. No recovery time.

NURSE/THERAPIST

Face	£2,495
(Price if done separately would have been)	(£3,039)
Neck	£2,575
(Price if done separately would have been)	(£3,420)
Face and neck	£3,795
(Price if done separately would have been)	(£4,679)
Cellulite or body tightening	Price proportional to area treated
Fotona smooth eyes added after each Fotona treatment (slight pinkness afterwards)	£750

If submental (jawline) treated with Sofwave at the same time, add an extra £305.

See page 23 for additional packages.

Skin Tightening - Fotona

Fotona is an advanced and very versatile laser which has several unique settings. They all have advantages to the skin and work best when combined as four steps (4D treatment). It is recommended that they should be done as a course of 4-6, ideally every 3-4 weeks. Full effects are seen at 6-9 months.

'Super Piano' mode for Tightening and Prevention of Sagging

Piano mode is gentle NdYag laser delivered in a long pulse. This unique delivery of gentle heat has some immediate effect on skin tightening, but more importantly also stimulates long-term collagen production and skin tightening. It has been shown that if done repeatedly, it can help reduce future 'sagging'. There is no recovery time, the skin looks normal afterwards and makeup can be applied straight after the treatment. It can be performed on all skin colours.

	DERMATOLOGIST	NURSE/THERAPIST
Face	£495	£195
Neck	£495	£195
Face and Neck	£655	£295
Abdomen	£520	£375
Upper arms	£565	£395
Knees	£395	£255
Thighs	£625	£395

Fotona 4 Step (also called 4D). The most popular Fotona choice for tightening and texture (fine lines)

This method uses four different treatment modes in sequence starting with;

1. Gently heating inside the mouth, with controlled slow heat (smooth mode) which tightens loose skin around the mouth and lower face.
2. Frac-3 gentle NdYag delivered as short pulses (for pore cleansing, improving texture, tightening and fine lines)
3. Super Piano mode (for additional skin tightening).
4. A light erbium fractionated laser peel to reduce surface irregularities and brown spots or the "Smooth Mode" to gently heat and provide additional superficial tightening of the skin.

Done repeatedly this combination stimulates collagen, closes pores, tightens the skin and improves texture. Ideally done in a course of 4-6 every 3-4 weeks. Full effects are seen at 6-9 months.

PRICE PER TREATMENT:	DERMATOLOGIST	NURSE/THERAPIST
Face	£995	£595
Face and Neck	£1,100	£695

Fotona SmoothEye® Laser

This uses a gentle heating of the skin using a prolonged pulse of the erbium laser. It heats the skin and results in tightening of the loose skin around the eyes. The treatment can be done at a lower setting which causes slight pinkness and slight flaking lasting 24-48 hours, or a strong setting which causes deeper pinkness and flaking lasting up to 7 days. Repeated treatments give additional improvement.

	DERMATOLOGIST	NURSE/THERAPIST
Done alone	£645	£495
When added to Fotona 4 Step (4D)/Fraxel Restore/Sofwave	£495	£385

Fotona Smooth® Sculpting

This uses the Smooth® Mode to gently heat and superficially tighten the skin in localised focused areas, using it to sculpt the face (for 15 minutes).

	DERMATOLOGIST	NURSE/THERAPIST
Done alone	£495	£295
When added to Fotona 4 Step (4D)	£150	£95

Fotona LipLase®

This uses the gentle heating effect the Smooth® Mode both inside and outside the lips to stimulate collagen production and provide some temporary plumping of the lips. It can be combined with the Piano Mode for added deeper stimulation of collagen when done repeatedly.

This enhances the lips producing plumper, smoother lips in a non-surgical way that does not involve needles or fillers. Usually 3-4 sessions are needed.

	DERMATOLOGIST	NURSE/THERAPIST
One session	£395	£250
If added to Fotona 4 step (4D)	£150	£95

Fotona T-Runner – Honeycomb for Deeper Skin Tightening

The unique extra long pulse of the erbium laser (V-Smooth Smooth Mode) delivered quickly and evenly with a scanner (T-Runner) to achieve evenly distributed deeper as well as superficial skin tightening. It can tighten the skin and improve the appearance of cellulite. No recovery time. Ideally six needed at intervals of 2-4 weeks (6th session free).

	DERMATOLOGIST	NURSE/THERAPIST
Neck	£595	£415
Face	£485	£325
Neck & Face	£675	£545
Abdomen	£585	£395
Arm Pits	£495	£255
Upper Arms	£595	£395
Knees	£395	£255
Thighs	£895	£450

For additional skin tightening, Super Piano mode can be added beforehand at 50% of the price of Super Piano alone, which would be:

	DERMATOLOGIST	NURSE/THERAPIST
Face	£247.50	£97.50
Neck	£247.50	£97.50
Face and Neck	£327.50	£147.50
Abdomen	£260	£187
Upper arms	£282.50	£197.50
Knees	£197.50	£127.50
Thighs	£312.50	£197.50

If Fotona T-Runner – Honeycomb is added as an additional step after Fotona 4 step (4D):

	DERMATOLOGIST	NURSE/THERAPIST
Neck	£350	£195
Face	£195	£155
Neck & Face	£295	£255

Full Fotona Face and/or Neck Tightening (Using all Fotona Tightening Modes)

Fotona 4D which includes the 'Super Piano', Smooth Sculpting and T Runner to achieve maximal tightening. Ideally done as a course of 3-6 treatments every 3-4 weeks. Full effects are seen at 6-9 months. Price per session.

	DERMATOLOGIST	NURSE/THERAPIST
Face	£1,350	£995
<i>(Price if done separately would have been)</i>	<i>(£1,975)</i>	<i>(£1,215)</i>
Neck	£1,195	£795
<i>(Price if done separately would have been)</i>	<i>(£1,685)</i>	<i>(£1,105)</i>
Face and Neck	£1,650	£1,295
<i>(Price if done separately would have been)</i>	<i>(£2,270)</i>	<i>(£1,535)</i>
Face and Neck	£495	£385

Treatments for Pigmentation

PicoWay® Targeted Laser to Individual Dark Spots or Tattoos

The most powerful laser technology for treating tattoos or individual brown spots.

Highly sophisticated, superfast, but gentle laser using Picowave technology to quickly and safely remove pigment of individual brown spots including 'sunspots', freckles, birthmarks as well as tattoos.

As the PicoWay® is so powerful it removes tattoos in significantly fewer sessions than the standard Q switch/nanosecond lasers and on average patients usually need approximately 3-4 sessions every 8 weeks compared to up to 12 sessions. Therefore, the tattoos are removed more quickly and overall, more cheaply with the PicoWay® laser. As it is so superfast it does not heat the skin and therefore does not result in post-treatment darkening. For tattoos all ink colours can be successfully removed (although white may not respond). For brown spots on average 2-4 sessions are needed. Price per session per diameter.

	DERMATOLOGIST	NURSE/THERAPIST
Initial test patch	£40	£30
Very small up to (1-3cm x 1-3cm)	£295	£195
Small area up to (4-8cm x 4-8cm)	£395	£235
Medium area up to (9-15cm x 9-15cm)	£495	£320
Large area up to (16-20cm x 16-20cm)	£695	£495
Additional area to large (per 1-10cm x 1-10cm)	£260	£199

PicoWay® Global/Whole Area Treatment (Full Beam or Fractionated)

A very popular treatment for pigmentation (e.g. melasma or post-inflammatory hyperpigmentation), wrinkles, scars, pores, skin rejuvenation or melasma.

The superfast Picolaser can be 'painted' over a whole area in a full beam or fractionated way to reduce pigmentation (e.g. melasma or post inflammatory hyperpigmentation but it also stimulates collagen, and elastin so can also be used to help wrinkles, scars, pores and skin texture. There may be pinkness, small bumps and possible slight pin-point blood vessels lasting 1-7 days, but this can usually be covered by makeup. It can be used safely on all skin types or with a tan without causing post inflammatory hyperpigmentation (post treatment darkening). It is not uncomfortable, with no need for local anaesthetic (feels like "sparkles" on the skin), and therefore suitable for all ages and skin types.

	DERMATOLOGIST	NURSE/THERAPIST
Face	£695	£495
Neck	£595	£495
Face and Neck	£795	£695
Hands	£465	£355
Chest	£695	£555
Face, neck and chest	£965	£675

PicoWay® Targeted and PicoWay® Global can be combined on same day, in which case, 10% off PicoWay® Targeted.

"Clear, Light and Bright" Treatment for Melasma

A combination of PicoWay laser to brown spots, followed by two passes of Gentle PicoWay and two passes of low energy Fraxel Dual. This is a useful combination to reduce pigmentation of melasma. There will be some swelling and flaking for a couple of days. The treatment can be repeated monthly.

	DERMATOLOGIST	NURSE/THERAPIST
Face	£999	£795
Neck	£825	£655
Face and Neck	£1,495	£999

Fractionated and Ablative Lasers

Fraxel Restore (non-ablative) with Dual Wavelength (1550nm or 1927nm wavelength)

For wrinkles, scars, pigment, pores, melasma and stretch marks. Several treatments (3-6) recommended for optimum results. Does not break the skin, therefore no pinpoint bleeding. Skin is pink and swollen for 5-12 days. Research from Harvard University suggests that repeated sessions reduce the rate at which new skin cancers develop and make the skin cells act younger. *The laser settings are decided by Dr Farrell. Nurses/laser therapists can treat all areas except around the eyes.*

	DERMATOLOGIST	NURSE/THERAPIST
Face	£895	£685
Face including around the eyes (eyes always done by Dr Farrell)	£1,345	£995
Acne scarring on cheeks	£625	£595
Chest	£895	£685
Neck	£755	£595
Face and neck (if around eyes also, add extra £450)	£1,345	£999
Neck and chest	£1,345	£999
Face, neck and chest (if around eyes also, add extra £450) (need to do chest on separate day to avoid overdose of local anaesthetic)	£1,695	£1,225
Around eyes only	£525	£???
Hands	£445	£395
1/2 arms or legs (both)	£895	£695

Fraxel Restore (non-ablative) Scars and Stretch Marks (Suitable for all scars whether soon after surgery or old scar):

	DERMATOLOGIST	NURSE/THERAPIST
Less than 5 cm ²	£265	£135
5 cm ² - 10 cm ²	£295	£155
10 cm ² - 100 cm ²	£395	£245
100 cm ² - 200 cm ² (Price for sites more than 200cm ² depends on surface area)	£575	£365

Scar Package - (pre-paid)

One Pulsed Dye/KTP Laser and Three Fraxel Restore Lasers (spaced 2-3 weeks apart)

Less than 5 cm ²	£395
5 cm ² - 10 cm ² (Price for sites more than 200cm ² depends on surface area)	£455

Fractionated Ablative CO₂ (Fraxel Repair or Fractionated UltraPulse Alpha CO₂ by Lumenis)

Creates small holes in the skin treating a fraction of the skin but leaving islands of skin behind for more rapid healing. Slight bleeding for 24-48hrs afterwards. Severe scars or wrinkles may need two or three treatments. Research from Harvard University suggests that repeated sessions reduce the rate at which new skin cancers develop and make the skin cells act younger. Prices include full aftercare with regular skin reviews while healing, all medication, skin healing creams, dressings and if appropriate LED light treatment to speed up healing. **(Deposit of £500 is required for all bookings)**

DR FARRELL

Face (if around eyes treated add extra £595)	£3,550
Face and neck (if around eyes treated add extra £595)	£4,320
Face, neck and chest (if around eyes treated add extra £595) (need to do chest on separate day to avoid overdose of local anaesthetic)	£4,995
Neck	£1,750
Acne scarring on cheeks only	£2,895
Acne scarring on cheeks plus other facial areas	£3,650
Chest	£1,950
Upper lip only	£1,850
Around eyes only	£1,950
Abdomen	£2,950
Hands	£935
Less than 5cm ² (e.g. scars)	£595
5-10cm ²	£650
10-100cm ²	£795
100-200cm ²	£895

Prices for other sites depend on surface area.

Fully Ablative CO₂ (ULTRApulse Alpha by Lumenis) or Erbium (Fotona) Resurfacing

Uses laser heat to flatten and remove tissue. Can be done on individual skin lesions e.g. skin tags, syringomas or can be done as a full skin resurfacing (deposit of £500 is required for all bookings). This treatment gives the most dramatic improvement in the appearance of the skin by reducing wrinkles, scars and imperfections plus tightening, as well as reducing the risk of skin cancer and making the skin cells act younger.

DR FARRELL

Less than 1cm ²	£625
Less than 5cm ²	£695
5-10cm ²	£795
10-100cm ²	£895
100-200cm ²	£1,600
Full Face Resurfacing (if around eyes treated add extra £595)	£4,995
Full Face with neck (if around eyes treated add extra £595)	£5,550

Scalp Resurfacing for Sun Damage (for widespread actinic keratoses)	£3,450
Rhinophyma reduction (bulbous thickening of the skin of the nose due to inflammation)	£2,995
A second rhinophyma session may be needed to "fine tune" the contours	£1,915
Around Eyes Alone	£2,795
Around Mouth Alone	£3,450

	DERMATOLOGIST	NURSE/THERAPIST
PRP (Platelet Rich Plasma) (6th session free)	£465	£395

A method of extracting your own concentrated natural growth factors from your own blood and then applying them into a site that needs treatment following Micro-needling or Ablative laser. Used to enhance collagen production and speed up healing on any body site, particularly the face and scars. It is also used to treat hormone/age hair loss and hair shedding.

Additional Scar Treatments

As well as fractionated non ablative and ablative lasers for scars, additional treatments such as those below may be helpful to add in (depending on the type of scar). A personalised treatment plan and price would be provided to you as part of the consultation.

Steroid Injection with or without 5-Fluorouracil

DERMATOLOGIST

Small (less than 5cm ²) steroid alone	£185
Large steroid (more than 5cm ²) or added 5-Fluorouracil	£395

Bimatoprost application for restoring pigment or post laser application

DERMATOLOGIST

To stimulate return of pigmentation to white scar	£185
---	------

Excision of Scars

This is best done by one of our plastic consultant plastic surgeons. The neat surgical scar can be faded with fractionated laser starting 1-2 weeks post scar excision. These prices are a guideline, and exact prices will be quoted during your consultation.

PLASTIC SURGEON

Small scars e.g. punch excision up to 3	£950
Extensive scars	£1,500 - £1,900
Ear lobe keloid scars	£1,995

Subcision of Scars

DERMATOLOGIST

Small area (less than 5x5cm ²)	£165
Larger area	£325
Taylor Liberator with Tumescant Anaesthesia	£995

Laser Assisted Drug Delivery to Scars

DERMATOLOGIST

Triamcinolone and / or 5 Fluorouracil application (advantage of more even distribution than injection) to fractionated scar	£265
Bimatoprost application to fractionated scar for white scars	£265
Sculptra application to fractionated scar for atrophic scars	£495

Laser Treatment of Fungus and Warts

Laser Treatment of Fungal Nails and Warts (with Long Pulse NdYag Laser)

DERMATOLOGIST

NURSE/THERAPIST

£295

£195

Gently heats the nail to halt fungal growth. Performed weekly for 4 weeks then monthly for 3 months then maintenance treatments every 3 months. Price per session.

Advisable to treat all toes as fungal spores can be present in all nails.

Laser Treatment of Fungal Nails with Fractionated Erbium or CO₂

Fractionated Erbium or CO₂ laser drills tiny holes into the nail. Anti-fungal cream/liquid is applied to the nail at home daily until new nail grows out. May need to be repeated at four months for slow growing nails. It is usually recommended to treat all toenails as there may be nail fungal infection which has not yet shown.

DERMATOLOGIST

Single Toenail

£475

All toenails

£820

(It is recommended to treat all digits as there may be nail fungal infection which has not yet shown).

Laser for Warts (we use a vascular laser rather than ablative laser for safety reasons to avoid viral particles being released into the air)

Per session for 5 or less warts £325

Per session for more than 5 warts £475

Usually several sessions at intervals of 2-3 weeks are required and number of treatments required varies.

Packages

Most Popular Combination Laser Skin Rejuvenating Treatments

Full Fotona Skin Tightening Package plus Fraxel Restore, plus red light

Our most popular combination treatment is Fotona 4D which includes 'Super Piano' with Smooth Eyes, Smooth Sculpting and the T Runner to achieve tightening followed by Fraxel Restore to improve texture, reduce fine lines, wrinkles, scars and brown marks. Followed by red LED light to speed up healing and provide additional skin improvement.

<i>(Price if done separately would have been)</i>	<i>(£11,769)</i>	<i>(£10,499)</i>

For any course above, if submental/jawline treated with Sofwave at the same time, add an extra £305.

LED Red or Infrared Light (After any Procedure)**£45**

“No Pain and Lots to Gain Packages”.

Popular No Down Time, No Recovery and No Pain Packages done on the same day

These are our most popular treatments as they benefit the skin but there is no recovery time and they do not require any pain killers or numbing cream. You can go back to normal activities straight away after the treatment. When done repeatedly, they improve skin quality, fine lines, pores, texture and brown marks. They can be done in combination, on the same day, for best results. Therefore, we have put together packages for these no-recovery treatments. For the following treatments, if done on the same day with the nurses/laser therapists, you pay full price for the most expensive treatment and a 20% discount for any additional treatments. For treatment on the face:

HydraFacial Platinum with Booster	£225
Piano	£195
Lumecca	£295
LaserGenesis	£235
PicoWay Global	£495
Followed by LED Light at a reduced price of	£45

Hand Restoratixon “Super Packages”

	DERMATOLOGIST	NURSE/THERAPIST
Profhilo to restore the natural plumpness, hydration and softness of the hands (one syringe)	£495	£425

FOLLOWED ONE WEEK LATER BY:

	DERMATOLOGIST	NURSE/THERAPIST
Removal of brown spots on hands with Fraxel Dual reduced to	£425	£375
Removal of brown spots on hands with Lumecca IPL reduced to	£255	£165
Removal of brown spots on hands with PicoWay reduced to	£450	£335
If Radiesse used instead of Profhilo	£???	£625

Treatments for Hair Loss

HAIRestart® Laser Hair Stimulation by Fotona (6th session free)

Several reports suggest this gentle unique laser setting laser can help improve some forms of hair loss.
Best performed every 2 weeks.

	DERMATOLOGIST	NURSE/THERAPIST
One treatment	£350	£145
Course of 6 (pre-paid i.e. 6 th treatment free)	£1,750	£725

HydraFacial® HydraScalp with Keravive™ (6th session free)

Designed by the HydraFacial company, this treatment exfoliates and deep cleanses the scalp and infuses peptides which may stimulate hair growth and hair density. Best performed every four weeks.

	NURSE/THERAPIST
One treatment	£450
Three treatments monthly	£1,100

PRP (Platelet Rich Plasma) (6th session free)

A method of releasing, extracting and activating your natural growth factors from your own blood and delivering them into the scalp to stimulate hair-growth. Best done monthly for 3 months and then every 1-3 months.

	DERMATOLOGIST	NURSE/THERAPIST
PRP (Platelet Rich Plasma) (6 th session free)	£465	£395

Botox and NCTF

£795

Botox and NCTF (a combination of antioxidants and peptides which act as nutrients to the hair follicles) injections into the scalp have been reported to stimulate hair growth in pattern alopecia.

Packages: Male and Female Hair Thinning with Nurses

6 sessions of HydraFacial® HydraScalp with Keravive™ every 4 weeks plus 24 sessions of Fotona HaiRestart® laser every week	£2,900 (saving of £3,480)
6 sessions of PRP plus HydraFacial® HydraScalp with Keravive™ every 4 weeks plus 24 sessions of Fotona HaiRestart® laser every week	£4,450 (saving of £4,300)
6 sessions of PRP every 4 weeks plus 24 sessions of Fotona HaiRestart®	£2,800 (saving of £3,240)
6 sessions of PRP plus 6 HydraFacial® HydraScalp with Keravive™	£3,750 (saving of £1,320)

Polynucleotides (Plinest)

Polynucleotides are small signals which stimulate certain cell signals. They can be used as multiple small injections into the scalp to provide the biochemical signals which may enhance optimal hair growth. It is usually recommended to do monthly.

	DERMATOLOGIST	NURSE
Single treatment (one syringe 2ml)	£475	£395

Laser Hair Reduction Prices

Long pulse Alexandrite or NdYag lasers are both available so all skin colours can be safely treated. At least six sessions are usually required. If a course of six is pre-paid, the sixth session is free. All treatments bought as a pre-paid course must be completed within 12 months.
